

Platri IT Environmental Policy

OUR VISION

Platri IT has made it their mission to make **environmental sustainability** an indispensable part of their business.

We want to **promote sustainability** and **environmental awareness** at all levels of the company.

We are aware that **climate change** is a serious challenge and that our **actions** have an **impact** on the **environment**.

OUR COMMITMENT

Sustainability as a central corporate value

At Platri IT, sustainability and environmental awareness are at the heart of our business practices. As an innovative IT company, we are committed to always keeping an eye on and minimizing the environmental impact of our activities. We comply with all applicable environmental laws, regulations and policies and are committed to working to act sustainably in all relevant areas.

Our employees play a crucial role in the implementation of our sustainability goals. We are committed to fully investigating any complaint or improvement and acting quickly to address potential environmental im

Let's continue to work hard together to maintain Platri IT's high standards and help shape the future of the IT industry.

OUR COMMITMENT

A green commitment - sustainability in every aspect of our daily work at Platri IT.

At Platri IT, we see ourselves as a responsible company that is actively committed to a sustainable future. As part of our daily business practices, we are aware that there is no planet B. Therefore, we are determined to keep our ecological footprint as small as possible. In doing so, sustainability shall play an important role in our business strategy and operations.

The Corona pandemic showed us that the way we work can change quickly and effectively. By making heavy use of remote work and eliminating business travel, we were able to drastically reduce CO2 emissions and thus make an important contribution to climate protection.

As a 'Software as a Service' (SaaS) provider, we offer all HR seminars and training for our customers online as webinars through Platri, reducing travel for both parties.

OUR COMMITMENT

Commitment to sustainability - Our contribution to resource conservation

We are very concerned about protecting our environment and conserving natural resources. We are committed to avoiding unnecessary consumption of energy and resources and focus on sustainable consumption.

Our goal is to use electronic solutions to save paper and minimize waste. Our systems, such as for HR data, employment contracts and invoices, are managed and archived electronically.

We also offer our employees the opportunity to work from home in order to save time and energy and thus reduce greenhouse gas emissions. We recognize that remote work has many advantages and are pleased that we can make a positive contribution to environmental protection through it.

We firmly believe that sustainability and environmental awareness are an important part of our daily work and are happy to share these values with our employees and customers.

OUR COMMITMENT

Our commitment to the environment goes far beyond talk

As part of our commitment to a more sustainable environment, we are committed to minimizing our impact on the environment. To achieve this, we have set ourselves clear targets for 2023:

Energy efficiency

Investing in energy efficient appliances and lighting, turning off appliances when not in use, and using natural light to conserve electricity.

Eco-friendly cleaning products

Use of biodegradable cleaning products to avoid environmental impact.

Water Resources Management

Installation of economical taps.

Plants

Integrating plants into the office to create a healthy work environment and increase oxygen levels in the air.

Recycling

Implementation of an efficient recycling system to reduce waste and reuse materials in the production cycle.
